Work Experience

2007 – 2008

- External work for several clients, including advertising and webdesign companies. There is now a set of web sites, online databases, online applets, but also print ads, posters, booklets, etc. placed in the portfolio. Complete list with previews available at website.
- VIA-systems administration site. Uses client-side and server-side scripting languages to achieve clear and professional database interface with draggable and resizable windows with automated refreshing. All available on-site.
- Smega Runner project: FLASH software interface for nuclear power plants. Client: Alldeco s.r.o.

Jun. 2006 – 2007

- xaya3D Project: Drawing graphics for screensavers – digital painting and photomanipulation, 3D render, animating 3D characters. Creating web pages, banners and other advertisement graphics.
- TV Poprad skin: Promotional Graphics for Poprad Television. Client: Tatranské Lanové Dráhy a.s.
- ArchSat player: Software for playing satellite broadcast (video stream) based on VLC + Dreambox technologies and designed for Windows Media Center. Client: Webfork - subsidiary company of J&T FINANCE GROUP.
- TLD Video Player skin: Video player and presentation management software for Slovak Tatras Cableway. client: Tatranské Lanové Dráhy a.s.
- O.O.Diana database software: Based on scripting languages. Uses web camera for taking photos. Flash is implemented to achieve fluent and professional interface.

Mar. 2006 – Jun. 2006

- Permanent employment in company operating in the mobile entertainment industry: Mediavox s.r.o. Work including web page designs, advertisement banners, wallpapers, animations and videos for mobile phones, creating and DTP for press ads, organizing external graphics designers.

Jun. 2004 – Dec. 2004

- Permanent employment in Gotthardt Advertising Company. Designing and DTP for posters, coupons, annual reports, cover-designs, billboard, logo-designs.
